REISSUE APPLICATION DECLARATION BY THE INVENTOR	Docket Number (Optional) YOR919980405US2 (8728-631 RE)
---	---

As a below named inventor, I hereby declare that:

My residence, mailing address and citizenship are stated below next to my name.

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is described and claimed in patent number 6,249,844, granted June 19, 2001, and for which a reissue patent is sought on the invention entitled

Identifying, Processing and Caching Object Fragments in a Web

the specification of which

is attached hereto.

was filed on June 19, 2003 as reissue application number 10/601,267

and was amended on _____
(If applicable)

I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

by reason of a defective specification or drawing.

by reason of the patentee claiming more or less than he had the right to claim in the patent.

by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

I intended to describe and claim a feature of my invention for enhancing the caching of objects including object fragments by "a client processing the object description including the associated persistent object fragment identity." Such a feature is described in the specification and shown in the drawings as filed in the original application for which '844 patent issued. (See, for example, figures 1-13 and corresponding text in the original specification). Such features were not claimed in the application and are not in the claims of the '844 patent. This deficiency arose after the filing of the orginal application from which the '844 patent issued and was caused by the failure of the patent attorney in appreciating the full scope of my invention.
